

DRIVE YOUR OPERATIONS WITH  
**GATES® POLY CHAIN®**

When it comes to the food and beverage industry, heavy maintenance schedules, wasted resources and contamination can slow down profitable operations.

**Say goodbye to Roller Chain. There's a new hero in town.**

**ZERO MAINTENANCE:**

Poly Chain® GT™ Carbon™ belts last 3x longer, giving you less downtime than roller chain. Will not stretch, say NO to re-tensioning and lubrication. Save time and money.

**RUST-RESISTANT:**

Designed for wet environments and inert to most acids and chemicals.

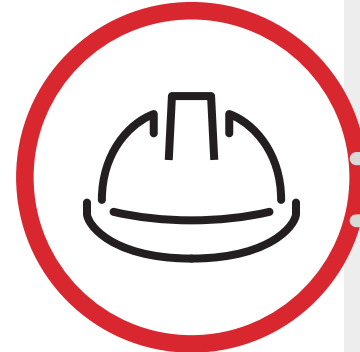

**INCREASED POWER:**

The Poly Chain® GT™ Carbon™ uses carbon fibre tensile cords, making it capable of withstanding shocks, surge loading and heavy abrasion.

**SAFETY:**

Requires no lubrication, which eliminates risk of fire or tripping injuries. Say goodbye to noise pollution from heavy chains.

**MAKE THE SWITCH**

**SAVE ON**

**TIME**

Eliminate 3,120 minutes of downtime over the course of 2 years

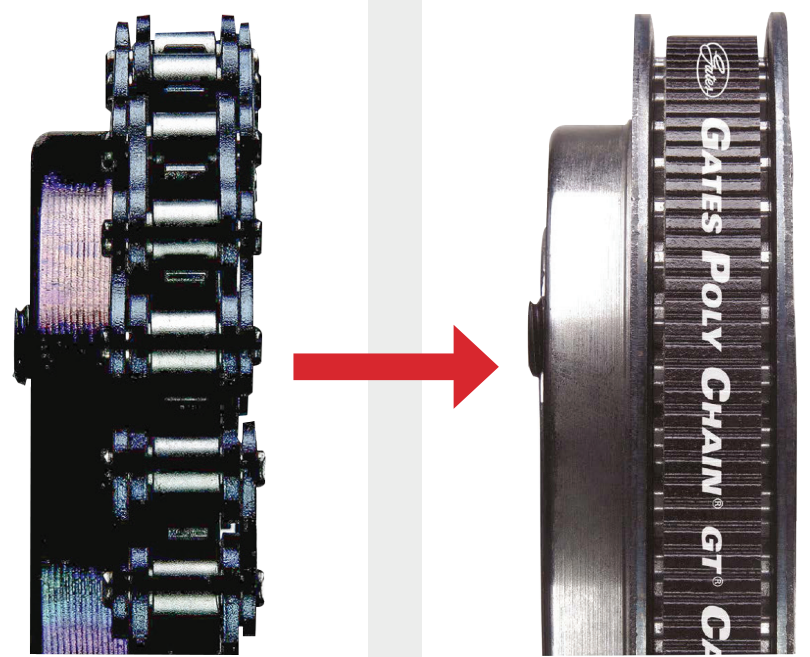

**MONEY**

No washdowns, scheduled maintenance or re-tensioning required

**PEOPLE**

97% lighter than traditional roller chain, making it easier and safer to install.

Roller chain

Synchronous drive conversion

In the food & beverage industry, time is money. **Gates Poly Chain® GT™ Carbon™** is grease and rust free, designed to reduce downtime, improve safety and eliminate maintenance costs.

It's a match made in heaven.
